### SUMMARY

- Built a website with two types of logins: one for admins and another for customers, ensuring each group has their unique access.
- Created smooth navigation using React Router and added extra security by allowing only authorized users to visit certain pages.
- Managed data efficiently using Redux, which improved the performance and kept the user experience consistent.
- Made shopping easier for customers by allowing them to view, buy products, and add items to their cart.
- Added useful features like filtering for top discounted products and searching for products, all on the website.
- Connected to external data sources using Axios, ensuring the website interacts seamlessly with external information.
- Designed a user-friendly and good-looking website by using Reactstrap and MDBBootstrap to create a visually appealing user interface.
