- GRAPHQL
- APOLLO SERVER
- CSS
- BOOTSTRAP
- HTML/HTML5
- HASURA
- GIT
- POSTMAN
- INSOMNIA
- SQL
- SORCETREE
- REACT JS
- REDUX-TOOLKIT
- SASS

PROJECT

NAME	**DSA.OS -** SAAS BASE PROJECT TO MANAGE LOAN APLICATIONS
ROLE	LEAD PROJECT, API DEVELOPMENT AND TESTING
PACKAGE	NODE, GRAPHQL, APOLLO SERVER, REACT, AXOIS, DIGITAL OCEN, CASH FREE, FIREBASE
LINK	DSAOS.COM

SUMMARY

- Developed and launched DSAOs.com, a SaaS project for optimizing operations in loan application utilizing Digital Ocean for secure data storage and privacy management.
- Implemented a multi-user system with distinct roles: admin, DSA, DSA's employee, bank executive, builder, builder's employee, agent, and customer.
- Engineered a robust access management system ensuring role-specific permissions for enhanced security.
- Utilized Cash-free for subscription-based payment processing, providing a seamless payment experience for users.
- Integrated Firebase for notification services, enhancing real-time communication and updates for users.
- Implemented a ticket generation system for bug reporting by DSAs, enabling efficient bug tracking and resolution through an integrated chat feature.
- Enabled connectivity for builders, bank executives, and agents to connect with multiple DSAs by sending connection requests.
- Introduced four subscription plans - Basic, Standard, Premium, and Enterprise - allowing DSAs to connect with other users and set data limits according to their plan.

- Developed a client-centric approach, actively understanding and implementing client needs to tailor the platform to specific requirements.
- Engineered the platform to be scalable for potential future growth in users, data, and features.
- Integrated external systems and APIs, such as Digital Ocean, Cash-free, Firebase, and others, to enhance platform functionality.
- Implemented comprehensive testing strategies, including unit testing, integration testing, and user acceptance testing, ensuring platform reliability.
- Created detailed documentation for users, administrators, and developers, enhancing usability and troubleshooting.
- Utilized a combination of technologies, frameworks, and tools, including Digital Ocean, Cash-free, Firebase, and others, in the development of DSAOs.com.

NAME	**TENDER -** ROUGH DIMOND ONLINE BID
PACKAGE	NODE, GRAPHQL, APOLLO SERVER, EXPRESS
ROLE	API DEVELOPMENT

SUMMARY

- Issued comprehensive tender for rough diamond procurement.
